General information

Your ALCATEL ONETOUCH Fierce™ 2 is a transceiver that operates on UMTS Triband 850/1900/ AWS.

Protection against theft

Your mobile phone is identified by an IMEI (mobile phone serial number) shown on the packaging label and in the product's memory. We recommend that you note the number the first time you use your mobile phone by entering *#06# and keep it in a safe place. It may be requested by the police or your network operator if your mobile phone is stolen.

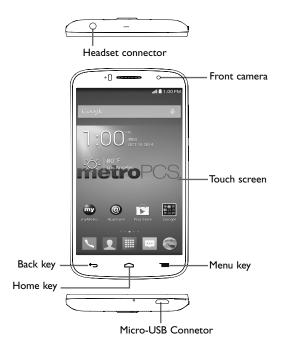

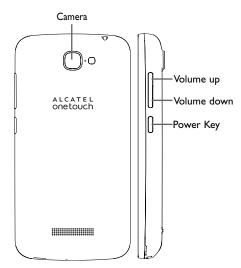

This product meets applicable national SAR limits of 1.6 W/kg. The specific maximum SAR values can be found in the SAR INFORMATION section of this user guide.

When carrying the product or using it while worn on your body, either use an approved accessory such as a holster or otherwise maintain a distance of 1.5 cm from the body to ensure compliance with RF exposure requirements. Note that the product may be transmitting even if you are not making a phone call.

Your mobile.....

. Keys and connectors

Power key

- Press:To lock or light up screen.
- Press and hold: To show the pop-up menu to select from Power off/Restart/Airplane mode and Silence/Vibrate/Ringer.
- Press and hold when phone is off to power phone on.
- Press and hold Power key and Volume down key to capture a screenshot.
- Press to mute the ringtone when there's an incoming call.

Back key

* Touch to go back to the previous screen or to close a dialog box, options menu, notifications panel, etc.

Home key

• While on any application or screen, touch to return to the Home screen.

Menu key

- Touch Menu key once to access Add widgets, Manage applications, Wallpaper and Settings options.
- Touch and hold Menu key to access recently used apps list. Touch app icon in list to launch
 app, to remove an app from list swiping app icon to left or right.

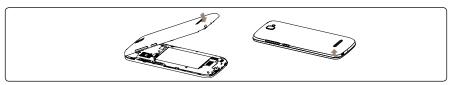

- · In call mode adjusts the earpiece or headset volume.
- In Music/Video/Streaming mode adjusts the media volume.
- In general mode adjusts the ring tone volume.
- Mute the ringtone of an incoming call.
- In Camera mode use keys to take a photo.
- ${\mbox{\ensuremath{\bullet}}}$ Press to light up the screen when it dims during a call.

1.2 Getting started

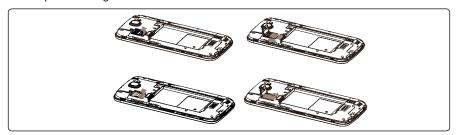

I.2.I Set-up

Attaching or removing back phone cover

Inserting or removing SIM card

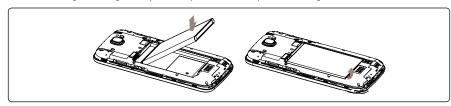

You must insert your SIM card to make phone calls. Before inserting/removing SIM card, ensure phone is off to prevent damage.

To install SIM card, start by sliding the metal tray up to unlock position, tray will click and release when unlocked. Place the SIM card into the slot with gold contacts facing downward. Once SIM card is placed into slot, close metal tray, then slide tray down, tray will click when locked. Reattach back cover to phone and power phone on. To remove SIM card, slide the metal SIM card tray to unlock position and gently slide the SIM card out from slot.

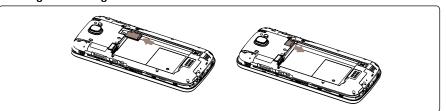

Installing or removing battery

Before inserting/removing battery, ensure phone is off to prevent damage.

- Insert battery into slot until locked in position, then close the battery cover.
- Remove battery cover and unlock battery from slot, then remove.

Inserting or removing microSD™ card

Installing microSD card

- Power off your phone, remove back cover by pulling cover up and remove battery.
- Locate the microSD card slot located above top right corner of battery compartment.
- Insert the microSD card into the microSD slot with the gold contacts facing downward and gently push in microSD card until it locks into slot.
- Reinsert battery into battery compartment until locked in position, then reattach the battery cover.

Removing microSD card

- To remove card, remove the battery cover and battery, then slide the microSD card from slot gently.
- $\bullet \ \ Reinsert \ battery \ into \ battery \ compartment \ until \ locked \ in \ position, then \ reattach \ the \ battery \ cover.$

Charging battery

Connect USB Cable provided to your phone and charger, then connect charger to electric outlet. Phone charging icon will display on status bar, confirming battery charging.

The charging icon will not display if your battery is completely consumed. To reduce power consumption and energy waste, when battery is fully charged disconnect your charger from the plug; switch off Wi-Fi, GPS, Bluetooth or background-running applications when not in use; reduce the backlight time, etc.

1.2.2 Power on your phone

Hold down the **Power** key until the phone powers on, unlock your phone (Slide, PIN, password, pattern) if necessary, once unlocked Home screen is displayed.

If you do not know your PIN code or if you have forgotten it, contact your network operator. Do not store PIN code within your phone, instead store PIN in a location that is accessible without using phone.

Setting up your phone for the first time

The first time you power on the phone, you should set the following options:

- Touch **Get started**, then select the phone's language.
- Select Input Method: Touch Swype or Android Keyboard and touch Next.
- Select Wi-Fi: Touch Add network to add a new Wi-Fi, touch Back to return to previous section.
- Select Date & Time: Automatic Time Zone will be preselected, to customize deselect this option, make changes and touch Next.
- Setup your Google account: Touch Setup now and you will be prompted to sign in to your Gmail account.

If you forget your password, you can go to http://www.google.com/ to retrieve it. If you don't own a Google Account, you are prompted to create one by touching **NEW** and then touch **Get an account**. Touch **Not now** to skip to the next step.

- · Back up & reset: Review default marked options and touch Next.
- Location access: Choose preferred location access option and touch Next.
- · Finished screen will be displayed, touch Finished to exit.

When phone is powered on without a SIM card inserted, you may still sign into your Google account and use some features by connecting to Wi-Fi network (refer to section **6.1.2 Wi-Fi**).

1.2.3 Power off your phone

Hold down the Power key from the Home screen until the Phone options appear, select Power off.

1.3 Home screen

Home screen is provided in an extended format to allow more space for adding applications, shortcuts etc. Slide all Home screens horizontally left and right to get a complete view of the Home screens. The white squares at the lower part of the screen indicate which screen you are viewing.

■1:000M — Status bar

- Status/Notification indicators
- Touch and drag down to open the notifications panel.

Search bar

- Touch to enter text search screen.
- Touch ② to enter voice search screen.

Favorite applications tray

- Touch to enter the application.
- Touch and hold to move or change applications.

Applications icon

• Touch to open applications menu.

You can bring all your favorite and most frequently used items (applications, shortcuts, folders and widgets) to your Home screens for quick access. Touch the **Home** key to switch to last viewed Home screen from any screen, touch **Home** key twice to access default Home screen.

1.3.1 Using the touchscreen

Touch

To access an application, touch it with your finger.

Touch and Hold

Touch and hold the Home screen to access the available options for setting the wallpaper.

Drag

Place your finger on any item to drag it to another location.

Slide/Swipe

Slide/swipe your finger up and down and left to right to scroll through screens, applications, web pages, etc.

Flick

Flick your finger across screen to move through screens faster.

Pinch/Spread

Place your index finger and thumb on the screen surface and draw them apart or together to scale an element on the screen.

Rotate

Automatically change the screen orientation from portrait to landscape by turning the phone sideways to have a better view.

1.3.2 Status bar

From status bar, you can view both phone status (to the right side) and notification information (to the left side).

Status icons

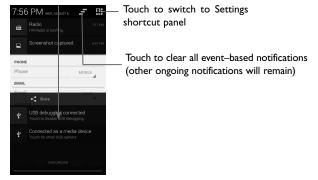

2 ⁶ 11	2G connected	0	Receiving location data from GPS
2 ^G	2G in use	9	GPS is on

Notifications panel

Touch and drag down the Status bar to open the Notifications panel. Touch and drag up to close it. From the Notifications panel, you can view wireless service information, access reminders/notifications and open apps.

Settings shortcut panel

Get quick access to your Google Profile or your phone's Brightness, Wi-Fi, Mobile network, Data connection, Data Usage, Rotation, Bluetooth or Location settings using the Settings shortcut panel. Use the Settings shortcut panel to enable, disable or adjust these settings options.

Also use the Settings shortcut panel to access all setting options by selecting Settings.

Touch to return to Notifications panel view

Settings shortcut panel

 Use the Settings shortcut panel to enable, disable or adjust various setting options.

1.3.3 Search bar

The phone provides a Search function which can be used to locate information within applications, the phone or the web.

Search by text

- Touch Search bar from the Home screen.
- Enter the text/phrase you want to search for.
- Touch the Enter/Search key on the keyboard to begin search.
- Use bottom menu bar with filters to view search results from Web, Images, News, Maps, Shopping, Videos, Books, Apps, or Phone.

Search by voice

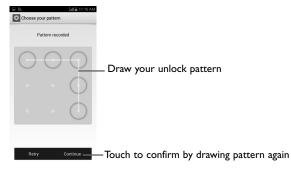

- Touch 👤 from Search bar to display a dialog screen.
- Speak the word/phrase you want to search for A list of search results will display for you to select from.
- Use bottom menu bar with filters to view search results from Web, Images, News, Maps, Shopping, Videos, Books, Apps, or Phone.

1.3.4 Lock/Unlock your screen

To protect your phone and privacy, you can lock the phone screen by choosing slide or creating a variety of patterns, PIN or password.

To create a screen unlock pattern (refer to section "Screen lock" for detail settings)

- From Homescreen touch Application icon | then touch Settings\Security\Screen Lock.
- Draw your own pattern.

To create a screen unlock PIN/Password

- Touch Settings\Security\Screen Lock\PIN or Password.
- Set your PIN or password.

To lock phone screen

Press the **Power** key once to lock the screen.

To unlock phone screen

Press the power key once to light up the screen, draw the unlock pattern you have created or enter PIN or password to unlock the screen.

If you have chosen **slide** as the screen lock, touch and drag the icon downward to unlock the screen.

Unlock phone screen shortcuts

Additional shortcuts are available from unlock screen: Call . Texting @ and Camera . While screen is locked swipe screen locked icon to any of these options to quickly access feature without needing to unlock screen.

Adding Apps and Widgets

To add an App touch the Applications icon , touch and hold an application to activate the Move mode, and drag the item to any Home screen.

Touch the **Menu** key \equiv and select **Add widgets** from menu options or press and hold an empty area on Home Screen to get instant access to Widgets menu. Touch and hold a widget to activate the Move mode and drag the item to any Home screen displayed.

While adding an application to a Home screen, drag it to the top of **App info** icon to view its detail information. If the application is downloaded, drag it to the top of **Uninstall** icon to unmount it directly.

Repositioning Apps and Widgets

Touch and hold the item to be repositioned to activate the Move mode, drag the item to the desired position and then release. You can move items both on the Home screens and in the Favorite applications tray. Hold the icon on the left or right edge of the screen to drag the item to another Home screen.

Removing Apps and Widgets

Touch and hold the item to be removed to activate the Move mode, drag the item up to **Remove** icon and release after the item turns red.

Creating folders

To improve the organization of items (shortcuts or applications) on the Home screens and the Favorite applications tray, you can add them to a folder by stacking one item on top of another. To rename a folder, open folder, touch the folder's title bar and input new name.

Wallpaper customization

Touch the **Menu** key on any Home screen, select **Wallpaper** from pop-up window to customize phone wallpaper. **Gallery** includes pictures you have taken, cropped or downloaded. **Live wallpapers** includes a scrolling list of animated wallpapers. **Homescreen wallpapers** includes all preset wallpapers in the phone. Slide left and right to locate a desired mage, touch **Set wallpaper** to confirm.

1.3.6 Applications menu

Touch iiii on the Home screen to enter the applications menu.

To return to the Home screen, touch the **Home (**

Recently-used applications panel

To view recently-used applications touch and hold the **Menu** \equiv key. Touch an app in list to open application. To remove an app from list swiping app to left or right side.

1.3.7 Volume adjustment

Using volume key

Press **Volume** key to adjust phone volume. To active the vibrate mode, press the **Volume down** key until the phone vibrates, the vibrate icon will be displayed on screen and status bar. Press the **Volume down** key once more to active the silent mode, silent mode icon is displayed on screen and on status bar. To get quick access to silent in vibrate or sound on which mode, hold down power button and select corresponding icon in menu.

Using volume settings menu

To access Volume settings menu, drag down the Notifications panel and touch and then select **Settings** (a), **Sound** and **Volumes** to set media, ringtone, notifications and alarm volume preferences.

To access **Volumes** from home screen touch then touch **Settings** o, select **Sound** and follow same steps described above.

1.4 Applications and widgets menu

The applications and widgets menus contain and provide access to all pre-installed and newly downloaded applications or widgets.

Accessing applications menu

To access the applications menu, touch iii from the Home screen.

Applications menu offers two views **ALL APPS**, to view all applications installed in phone, or **DOWNLOADED**, to view only applications downloaded from Google Play Store.

To download new applications from applications menu or Home screen touch **Google Play Store** icon and search for preferred applications by name, subject or category.

Accessing widgets menu

In widgets menu you will view all available widgets that can be added to your home screens.

To access the widgets menu touch the **Menu** key \equiv and select **Add widgets** from menu options.

To add widget to a home screen, touch preferred home screen displayed at the top of widget menu, then touch preferred widget. Selected widget will be placed on selected home screen (if space is not available on preferred home screen a new home screen with available space for widget must be selected).

To return to Home screen from applications or widgets menu touch the **Home** key or to return to previous screen from applications or widgets menu touch **Back** key .

2 Text input

2.1 Using Onscreen Keyboard

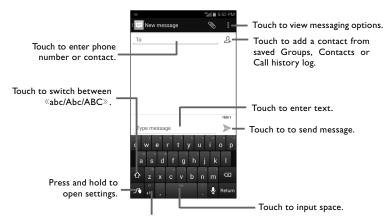

Onscreen Keyboard settings

Touch from the Home screen, touch **Settings** then select **Language & input**. The following keyboard & input methods will display: **Android keyboard, Swype** and **Google voice typing**. To customize any of these keyboards and input methods, touch for options.

Adjust the Onscreen Keyboard orientation

Turn the phone sideways or upright to adjust the Onscreen Keyboard orientation. You can also adjust Onscreen Keyboard orientation by changing the settings, touch then select **Settings\Display\Auto-rotate screen**.

2.1.1 Swype keyboard

Touch to switch between symbol and numeric keyboard.

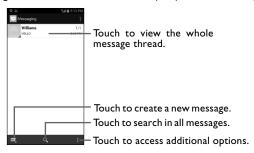

Switching keyboards from new message screen

When in new message screen, drag down the Status bar to open the Notifications panel.

In the Notifications panel, touch **Select input method**, from this input method shortcut menu you can choose between: **Android keyboard**, **Swype** or **Google voice typing**.

2.2 Text messaging

Use the text messaging feature to send and receive text (SMS) and multimedia (MMS) messages.

Creating a text message

In message screen, touch the new message icon = to create a new text/multimedia message.

You can edit the text you have entered.

- Touch and hold or double-tap within the text you would like to edit.
- Drag the tabs to change the high-lighted selection.
- The following options will show on top bar: Select all \blacksquare , Cut \blacksquare , Copy \blacksquare and Paste \blacksquare .
- Touch **Done** icon when editing is completed, to exit out of edit mode.

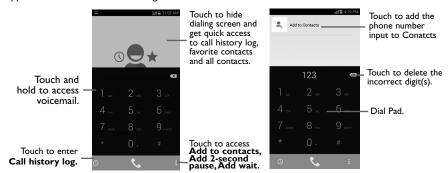

3 Phone calls, Call history log and People

3.1 Phone......

3.1.1 Placing a call

Easily launch a call using **Phone** cicon. Touch from the Favorite applications tray or from Applications menu to access dialing screen.

To input phone number choose from the following options: enter the desired number directly into dial pad, select a contact from **People** menu option or select contact from Call history log by touching then touch to place the call.

If you make an error when inputting a phone number, you can delete the incorrect digit(s) by touching <a>

To hang up a call, touch or the **Power** key.

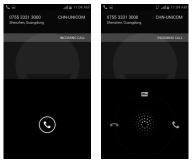

International call

To dial an international call, touch and hold \bigcirc to enter "+", then enter the international country prefix followed by the full phone number and finally touch \bigcirc .

Emergency call

If your phone has network coverage, dial emergency number and touch to make an emergency call. This works even without a SIM card and without typing the PIN code.

3.1.2 Answering or rejecting a call

When you receive a call, touch 🕓

- Slide the green icon 📞 rightward to answer;
- Slide the red icon leftward to reject;
- Slide the icon
 upward to reject a call and send a preset text message.

To mute incoming calls, press the Volume up/down key.

3.1.3 Accessing your voicemail

Voicemails are recorded messages left by incoming callers when calls are missed or forwarded to voicemail.

To access your voicemail, touch and hold on **Phone** dial pad.

To set up voicemail touch and hold $1 \le \infty$ to call voicemail. Follow the prompts to set up your voicemail account.

If you receive a voicemail, a voicemail icon **a** appears on the Status bar. Open the Notifications panel, touch **New voicemail** to access.

3.1.4 Visual Voicemail

Visual Voicemail allows users to view, listen and save all voicemails in any order directly from the phone, without the need of calling the voicemail system.

- From the Home screen or Applications menu, tap
- The inbox with all voicemail messages will be displayed. If this is the first time accessing Visual Voicemail, you may be prompted to enter a new PIN code and tap **Next** to activate Visual Voicemail.
- Tap on voicemail to listen to it.

3.1.5 Resetting your voicemail password

If you forget your voicemail password, you can reset it to the last four digits of your phone number. To start reset enter #793# into dial pad, touch to dial, remain looking at your screen and a message will display confirming reset of voicemail password to last four digits of your phone number, select **OK** when displayed and reset is completed.

3.1.6 During a call

To adjust the volume during a call, press the Volume up/down key on right side of phone.

- Touch to end the current call.
- Touch to display dial pad.
 - Touch to activate speaker mode during a call. Touch this icon again to deactivate speaker mode.
- $ot\!\!\!/$ Touch to mute the current call. Touch this icon again to unmute the call.
- Touch to hold the current call. Touch this icon again to retrieve the call.
- Touch to add another call, current call will be on hold.
 - To avoid misoperation on touch screen during a call, screen will be locked automatically when you put the phone close to your ear; touch screen will be unlocked when phone is taken away from your ear.

3.1.7 Call settings

When in Phone screen or dial pad screen, touch the **Menu** key \equiv , then select **Settings** to access the following options:

RINGTONE & VIBRATE

Phone ringtone Touch to select incoming call ringtone.

Vibrate when Mark the checkbox to enable vibrate when phone is ringing.

ringing

OTHER CALL SETTING

Voicemail

Service Opens a dialog box where you can select your carrier's voicemail service or another

service.

Setup If you are using your carrier's voicemail service, this opens a dialog box where you can

enter your voicemail phone number to manage and listen to voicemails.

Sound Touch to select incoming voicemail ringtone.

Vibrate Mark the checkbox to enable vibrate when received a new voicemail.

Vibrating after connected

Mark the checkbox to enable vibration when the call is connected.

Dial pad touch tones

Mark the checkbox, there is a sound when touch dial pad.

Quick responses

Touch to edit quick responses which will be used when you reject a call with a message.

Additional settings

Caller ID Opens a dialog box where you can set whether your phone number is displayed

when making calls.

Call waiting Mark the check box to notify you of a new incoming call.

3.2 Wi-Fi Calling

Wi-Fi Calling lets you make and receive voice calls and text /multimedia messages over your Wi-Fi network when your phone is connected to a Wi-Fi network and registered with your wireless carrier's network for Wi-Fi Calling.

When your phone is connected to Wi-Fi network, you will see 😭 at the top of your screen. Now you are able to use your device for calling and messaging even if you have no cellular coverage.

Enter the desired number into dial pad or select a contact from **Contacts** or **Call history** by sliding or touching tabs, then touch to place the call.

When the handset loses Wi-Fi coverage, any active call will drop and the phone will connect to the cellular network if available.

To make Wi-Fi Calling a default setting on your phone, select this option from Wi-Fi Calling Settings (Touch and hold the **Menu** key from the Home Screen, then select **Settings\More...\Wi-Fi Calling** or to access from the Dial screen, touch then touch **Settings\Other settings\Wi-Fi Calling**).

For more information you can find tutorial and top questions by Settings\More...\Wi-Fi Calling\Help.

\delta

Calls and messages made over Wi-Fi will be charged like cellular calls.

3.3 Call history log

You can access your call history log by touching from the Dial screen. Touch on the right side of contact/number to place a call directly. There are three kinds of calls in Call history logs:

- Incoming calls (blue arrows)
- Outgoing calls (green arrows)
- Missed calls (red arrows)

Touch a contact or number to view information or further operations.

You can view detailed call information, launch a new call, send messages, or add numbers to **People** (only available for unsaved phone numbers), etc.

Touch the photo to open the Quick Contact panel.

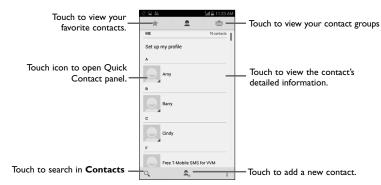

To clear the entire call history log, touch Menu icon and select **clear call history**, touch **OK** to confirm.

To delete individual call history logs, touch call log to open log screen and then hit Menu icon and touch **OK** to confirm.

The **People** app provides you with quick access to all your contacts.

3.4.1 Accessing your contacts

To access your contacts, touch the **People** \square icon located in your Favorite applications tray or Applications menu.

Touch **Menu** icon **1** to display contacts list option menu.

Following actions are enabled:

• Contacts to display Choose contacts to display.

• Import/Export Import, export or share contacts between phone, SIM card or microSD card.

Delete Select and delete unwanted contacts.

Accounts Manage the synchronization settings for different accounts.

Settings

Sort list by Touch to display contact information by first or last name.

View contact names as

Touch to view contact names by first or last name.

3.4.2 Managing contact groups

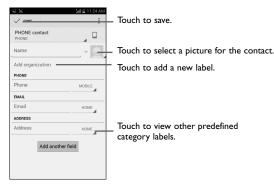

Contact groups help you organize your contacts. You can add, remove and view groups in the **Contact group** screen.

Touch the icon to view local groups. To create a new group, touch the icon to enter the new name and touch **Done** to confirm.

3.4.3 Adding a contact

Touch the icon \bigcirc in the contact list to create a new contact.

You are asked to enter contact's name and other contact information. By scrolling up and down the screen, you can move from one field to another.

If you want to add more information, touch Add another field to add a new category.

When finished, touch **Done** to save.

To exit without saving, you can touch **Menu** icon and then touch **Discard**.

Add to/remove from Favorites

To add a contact to favorites, touch a contact to view details then touch $\stackrel{}{\swarrow}$ to add the contact to favorites.

To remove a contact from favorites, touch 👚 in contact details screen.

3.4.4 Editing your contacts

To edit contact information, touch the **Menu** icon in the contact details screen, then touch **Edit**. When finished, touch **Done**.

Delete a contact

To delete a contact, touch **Menu** icon and **Delete** from contacts list screen. Pick the contact you want to remove and touch **Done** to confirm. Touch **Select all** to delete all contacts, touch again the checkbox or touch **Back** key to cancel the selected one.

The contact you have deleted will also be removed from other applications on the phone or web the next time you synchronize your phone.

3.4.5 Communicating with your contacts

From the contacts list, you can communicate with your contacts by making a call or exchanging messages.

To launch a call to a contact, touch the contact to enter the detail screen, then touch the number.

To send a message to a contact, touch the contact to enter the detail screen, then touch the icon on the right side of the number.

Use Quick contact for Android

Touch a contact's picture to open Quick Contact for Android, then you can touch the number or the icon \blacksquare for the way you want to connect.

The icons available on Quick Contact panel depend on the information you have for the contact and the applications and accounts on your phone.

3.4.6 Contacts importing, exporting and sharing

This phone enables you to import contacts from SIM/storage and export contacts to storage which can then be used to back up your information.

From Contacts screen, touch Menu icon to open options menu, touch Import/Export, then select Import from SIM card, Export to SIM card, Import from storage, Export to storage or Share visible contacts.

To import/export a single contact from/to storage or account, choose a target storage device, select the contact you want to import/export, touch **Done** to confirm.

To import/export all contacts from/to storage or, choose a target storage device, touch **Select all** and **Done** to confirm.

You can share a single contact or contacts with others by sending the contact's vCard to them via Bluetooth, Gmail, etc.

Touch a contact you want to share, touch Menu icon and Share from contact details screen, then select the application to perform this action.

3.4.7 Displaying contacts

You can configure which group of contacts, for each account, you want to display in the Contacts list. Touch Menu icon and touch Contacts to display from contacts list screen, then you can choose contacts to display.

Touch Menu icon and Settings, you can sort list by first or last name, as well as view contact names by first or last name.

3.4.8 Joining/Separating contacts

To avoid duplication, you can add any new contact information to existing contacts in a single action.

Touch the contact which you want to add information to, touch Menu icon and touch **Edit**, then touch Menu icon again and touch **Join**.

At this time, you are required to select the contact whose information you want to join with the first contact. The information from the second contact is added to the first one, and the second contact will no longer be displayed in the Contacts list.

To separate contact information, touch the contact whose information you want to separate, touch Menu icon and touch **Edit**, then touch Menu icon again and touch **Separate**, touch **OK** to confirm.

3.4.9 Accounts

Contacts, data or other information can be synchronized from multiple accounts, depending on the applications installed on your phone.

To add an account, touch Application icon important from Homescreen and touch of to enter Settings, then touch Add account; or from Contacts screen, touch and select Add new account.

You are required to select the kind of account you are adding, like Google, Corporate, etc.

As with other account set-ups, you need to enter detailed information, like username, password, etc.

You can remove an account and all associated information from the phone. Open the **Settings** screen, touch the account you want to delete, touch the Menu icon and **Remove account**, then confirm.

Sync manually

You can also synchronize an account manually on **Account** screen, touch an account in the list, then touch Menu icon **Account** and **Sync now**.

4 Messaging, Email.....

4.1 Messaging......

You can create, edit and receive SMS and MMS messages with this phone.

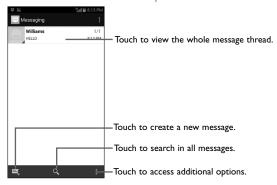

To access this feature, touch Application icon ightharpoonup iff from the Home screen, then select Messaging.

All messages you receive or send out can be saved in phone memory or SIM card. To view messages stored in SIM card, touch Menu icon from Messaging screen, then touch Settings\
Manage SIM card messages.

4.1.1 Write message

In message screen, touch the new message icon to write text/multimedia messages.

To communicate with a saved contact, touch contact photo to open **Quick Contact** panel. For unsaved contacts, touch default photo to add the number to your **Contacts**.

Sending a text message

Enter the mobile phone number of the recipient in the **To** bar or touch 2 to add recipients, touch **Type message** bar to enter text message. When finished, touch to send the text message.

An SMS message of more than 160 characters will be charged as several SMS. When the total number of characters you have entered is approaching the 160-character limit, a counter will appear on the lower right corner below Send option of the text box to remind you how many characters are allowed to be entered in one message.

Specific letters (accent) will increase the size of the SMS, which may cause multiple SMS to be sent to your recipient.

Sending a multimedia message

MMS enables you to send video clips, images, photos, animations, slides and sounds to other compatible mobiles and e-mail addresses.

An SMS will be converted to MMS automatically when media files (image, video, audio, slides, etc.) are attached or subject or email addresses are added.

To send a multimedia message, enter the recipient's phone number in the **To** bar, touch **Type message** bar to enter the text of the message. Touch Menu icon to open the option menu, touch **Add subject** to insert a subject, and touch to attach picture, video, audio or file.

When finished, touch to send the multimedia message.

Attach options:

 Pictures Provides access to Gallery application or File manager to select a picture as

attachment.

• Capture picture Provides access to Camera to capture a new picture to attach.

 Videos Provides access to Gallery application or File manager to select a video as attachment.

Provides access to Video Camera to record a new video to attach. Capture video

 Audio Provides access to Ringtones or Audio to select a ringtone, music track or audio file

as attachment.

 Record audio Launches voice message recorder to record a voice message to attach.

 Slideshow Launches Slide show edit screen, touch Add slide to create a new slide, and touch

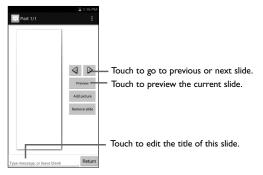

currently existing slide to edit it (see following picture). Touch Menu icon | to get

more actions, like setting the slide duration, add music, etc.

Provides access to People application to select one or more contact(s) to attach. Contact

 Calendar Provides access to Calendar to select events to attach.

4.2 Gmail/Email

The first time you set up your phone, you can select to use an existing Gmail or to create a new Email account.

4.2.1 Gmail

As Google's web-based email service, Gmail is configured when you first set up your phone. Gmail on your phone can be automatically synchronized with your Gmail account on the web. Unlike other kinds of email account, each message and its replies in Gmail are grouped in your inbox as a single conversation; all emails are organized by labels instead of folders.

To access Gmail

From the Home screen, touch the Application icon ito enter the applications list, then touch **Gmail**.

To create and send emails

- Touch the icon from Inbox screen.
- Enter recipient(s)'s email address in **To** field, and if necessary, touch Menu icon and touch **Add Cc/ Bcc** to add a copy or a blind copy to the message.
- Enter the subject and the content of the message.
- Touch Menu icon and select **Attach file** to add an attachment.
- Finally, touch the icon > to send.
- If you do not want to send the mail out right away, you can touch Menu icon and Save draft or touch Back key to save a copy. To view the draft, touch the icon, then select Drafts.

If you do not want to send or save the mail, you can touch Menu icon and then touch **Discard**.

To add a signature to emails, touch Menu icon and account, then touch **Signature**.

To receive and read your emails

When a new email arrives, you will be notified by a ringtone or vibration, and an icon will appear on Status bar.

Touch and drag down the Status bar to display the Notifications panel, touch the new email to view. Or you can also access the Gmail Inbox label and touch the new mail to view.

You can search for an email by sender, subject, label, etc.

- Touch the icon Q from Inbox screen.
- Enter the keyword you want to search for in the searching box and touch the **Q** key in the software keyboard.

To reply or forward emails

When viewing an email, you will see further options at the center of the conversation.

- Touch to enter text-inputting mode, enter the message you want to reply, then touch icon to send this message to one single recipient.
- Reply all

 Touch beside Reply icon and then touch Reply all to enter text-inputting mode, enter the message you want to reply, then touch icon to send this message to one single recipient or all people in a mail loop.
- Forward Touch beside Reply icon and then touch Forward to forward the message to another person. You are required to enter the new recipient's email address and then touch .
- Print Touch beside Reply icon and then touch Print to save and print the mail.

Managing Gmails by Labels

To conveniently manage conversations and messages, you can organize them using a Label.

To label a conversation when reading a conversation's messages, touch the icon and select **Change** labels to assign to the conversation.

To view conversations by labels when viewing your inbox or another conversation list, touch the icon \mathbf{Q} , then touch a label to move the mail to another label.

Mark the checkbox to select email to activate batch mode, and produce the following options:

- Touch to archive the email message.
- Touch to delete the email message.
- Touch to mark an email message as read or unread.
- **Move to** Touch to move the mail to system or labels.
- Mark important To Mark the email as important or not important.
- **Mute**To mute the entire conversation. When muted, new mails related to this conversation will not be displayed in **Inbox**, but archived.
- **Report spam** To report the email message/conversation as spam.
- Report phishing To report the email message/conversation as phishing.

To cut selected text • Cut

To copy selected text Copy

• Paste (I) To paste what you have previously copied to the entering bar

Option will not appear unless copy or cut operation has been made.

6

Getting connected.....

To connect to the internet with this phone, you can use 2G/4G networks or Wi-Fi, whichever is most convenient.

6. Connecting to the Internet

6.1.1 2G/4G

The first time you turn on your phone with SIM card inserted, it will automatically configure network service: 2G or 4G. If the network is not connected, you can touch all on Notifications panel.

To check the network connection you are using touch the Application icon from Home screen and touch to access Settings, then touch More...\Mobile networks\Access Point Names or Network operators.

To create a new access point

A new 2G/4G network connection can be added to your phone with the following steps:

- Touch the Application icon ${
 m ##}{
 m from}$ from Homescreen and touch ${
 m @}{
 m to}$ to access **Settings**.
- Touch More...\Mobile networks\Access Point Names
- Then touch icon
- Enter the required APN information.
- When finished, touch Menu icon and touch Save.

To activate/deactivate Data roaming

When roaming, you can decide to connect/disconnect to a data service.

- Touch the Application icon im from Homescreen and touch to access **Settings**.
- Mobile networks\Data roaming.
- Mark/Unmark the Data roaming checkbox to activate or deactivate data roaming.
- When Data roaming is deactivated, you can still perform data exchange with a Wi-Fi connection (refer to "6.1.2 Wi-Fi").

6.1.2 Wi-Fi

Using Wi-Fi, you can connect to the Internet when your phone is within range of a wireless network. Wi-Fi can be used on your phone even without a SIM card inserted.

To turn Wi-Fi on and connect to a wireless network

- Touch the Application icon if from Homescreen and touch to access **Settings**.
- Touch the switch beside Wi-Fi to turn on/off Wi-Fi.
- Touch Wi-Fi, the detailed information of detected Wi-Fi networks is displayed.
- Touch a Wi-Fi network to connect. If the network you selected is secured, you are required to enter
 a password or other credentials (you may contact your network operator for details). When finished,
 touch Connect.

To activate notification when a new network is detected

When Wi-Fi is on and the network notification is activated, the Wi-Fi icon will appear on the status bar whenever the phone detects an available wireless network within range. The following steps activate the notification function when Wi-Fi is on:

- Touch the Application icon ${\color{blue} \boxplus}$ from Homescreen and touch ${\color{blue} \circledcirc}$ to access **Settings**.
- Touch **Wi-Fi**. Then touch Menu icon and **Advanced** from Wi-Fi screen.
- Mark/Unmark the **Network notification** checkbox to activate/deactivate this function.

To add a Wi-Fi network

When Wi-Fi is on, you may add new Wi-Fi networks according to your preference.

- Touch the Application icon | from Homescreen and touch | to access Settings.
- Touch **Wi-Fi**, and then touch **#** to add network.
- Enter the name of the network and any required network information.
- Touch Save.

When successfully connected, your phone will be connected automatically the next time you are within range of this network.

To forget a Wi-Fi network

The following steps prevent automatic connections to networks which you no longer wish to use.

- Turn on Wi-Fi, if it's not already on.
- In the Wi-Fi screen, touch & hold the name of the saved network.
- Touch Forget network in the dialog that opens.

6.2 Chrome......

Using Chrome, you can enjoy surfing the Web.

- Touch Bluetooth
- Touch SEARCH FOR DEVICES
- Touch a Bluetooth device you want to be paired with in the list.
- If the pairing is successful, your phone connects to the device.

To disconnect/unpair from a Bluetooth device

- Touch the Settings icon 🌣 beside the device you want to unpair.
- Touch **Unpair** to confirm.

You are recommended to use ALCATEL ONETOUCH Bluetooth® headsets, which have been tested and proved compatible with phone. You can go to www.alcatelonetouch.com for more information about ALCATEL ONETOUCH Bluetooth® headset.

6.4 Connecting to a computer

With the USB cable, you can transfer media files and other files between your microSD card/phone's internal storage and the computer.

Before using MTP or PTP you should firstly mark **USB debugging**.

To access this function, touch Settings\About phone, then touch Build number 7 times. Now you
may touch Settings\Developer options\USB debugging.

To connect your phone to the computer:

- Use the USB cable that came with your phone to connect the phone to a USB port on your computer. You will receive a notification that the USB is connected.
- If you use MTP or PTP, your phone will be automatically connected.

Before using MTP, make sure that the driver (Windows Media Player 11 or above version) has been installed.

To format a microSD card

- Touch the Application icon ${\color{red} igoplus {1} \mbox{from Homescreen and touch } igotimes {\color{red} igotimes {0} \mbox{to access } \textbf{Settings}.}$
- Touch Storage.
- Touch Erase SD card. On the screen a popup warns you that formatting the microSD card will
 erase its contents, touch Erase SD card.

6.5 Sharing your phone's mobile data connection

You can share your phone's mobile data connection with a single computer via a USB cable(USB tethering) or with up to eight devices at once by turning your phone into a portable Wi-Fi hotspot.

The functions below may incur additional network charges from your network operator. Extra fees may also be charged in roaming areas.

To share your phone's data connection via USB

Use the USB cable that along with your phone to connect the phone to a USB port on your computer.

- Touch the Application icon ${
 m #}{
 m #}{
 m from Homescreen and touch }{
 m @}{
 m to access }{
 m Settings.}$
- Touch More...\Tethering & Mobile Hotspot.
- Mark\unmark the checkbox of **USB tethering** to activate/deactivate this function.

To share your phone's data connection as a portable Wi-Fi hotspot

- Touch the Application icon | from Homescreen and touch | to access **Settings**.
- Touch More...\Tethering & Mobile Hotspot.
- Mark\unmark the checkbox of **Mobile Hotspot** to activate/deactivate this function.

To rename or secure your portable hotspot

When Portable Wi-Fi hotspot is activated, you could change the name of your phone's Wi-Fi network (SSID) and secure its Wi-Fi network.

- Tethering & Mobile Hotspot and touch of to access **Settings**.
- Touch More...\Tethering & Mobile Hotspot.
- Touch Wi-Fi Hotspot Settings to change the network SSID or set your network security.
- Touch Save.

6.6 Connecting to virtual private networks

Virtual private networks (VPNs) allow you to connect to the resources inside a secured local network from outside network. VPNs are commonly deployed by corporations, schools, and other institutions so that their users can access local network resources when not inside that network, or when connected to a wireless network.

To add a VPN

- Touch the Application icon | from Homescreen and touch | to access **Settings**.
- Touch **More...\VPN**, then touch +.
- In the screen that opens, follow the instructions from your network administrator to configure each component of the VPN settings.
- Touch Save.

The VPN is added to the list on the VPN settings screen.

Before adding a VPN, you should set a lock screen pattern, PIN code or password for your phone.

To connect/disconnect to a VPN

To connect to a VPN:

- Touch the Application icon | from Homescreen and touch | to access Settings.
- Touch More...\VPN.
- VPNs you have added are listed; touch the VPN you want to connect with.
- In the dialog that opens, enter any requested credentials and touch Connect.

To disconnect:

· Open the Notifications panel and touch the resulting notification for the VPN disconnection.

To edit/delete a VPN

To edit a VPN:

- Touch the Application icon | from Homescreen and touch | to access Settings.
- Touch More...\VPN.
- VPNs you have added are listed; touch & hold the VPN you want to edit.
- Touch Edit profile.
- · After finished, touch Save.

To delete:

• Touch and hold the VPN you want to delete, in the dialog that opens, touch Delete profile.

Google Play Store is an online software store, where you can download and install applications and games to your Android Powered Phone.

To open Google Play Store:

- Touch Application icon if from the Home screen, then touch Play Store.
- For the first time you access Google Play Store a screen with terms of service pops up for your attention, touch Accept to continue.

Touch Menu icon **Help** to enter Google Play Store help page for more information on this function.

7.1 Locate the item you want to download and install

To buy an application(1)

On **Google Play Store**, some applications are labeled as free, while some of them are to be paid for before downloading and installing.

- Touch the application you want to buy.
- Touch the price on the up-right of the screen to preview the functions and data the application can access on your phone if you install it.
- · Touch Continue to confirm.
- When making your first purchase, you are required to input your credit card information and to log in to Google payment and billing service.
- If your account has multiple credit card accounts, select one to proceed.
- Select the Terms of service link and read the document. When finished, touch Back key.
- · Mark the checkbox if you agree with the terms of service.
- Touch **Buy now** at the bottom of the screen.

When finished, Android downloads the application.

To request a refund

If you are not satisfied with the application, you can ask for a refund within 15 minutes of the purchase. Your credit card will not be charged and the application will be removed. If you change your mind, you can install the application again, but you will not be able to request a refund.

- Touch icon and My apps from Google Play Store screen.
- Touch the application that you want to uninstall and refund.
- Touch Refund to uninstall the application and refund. If the button becomes Uninstall, your trial period has expired.
- In the survey form, select the answer that best matches your reason, and touch OK.
- (1) Google Paid applications may not be available to users in some countries.

7.3 Manage your downloads

After you downloaded and installed an application, the following further operations are available for your selection.

View

On Google Play Store screen, touch icon and My apps.

Uninstall

On Google Play Store screen, touch icon and **My apps**. Touch the application you want to uninstall to enter the details screen, touch **UNINSTALL**, and finally touch **OK** to confirm.

Refund

On Google Play Store screen, touch icon and **My apps.** Touch the application you want to uninstall for a refund, touch **Refund**, and finally touch **OK** to confirm.

Update notification

On Google Play Store screen, touch icon and **SETTINGS****Notifications** to enable update notification.

Auto update

To auto update all installed applications, touch icon and My apps from Google Play Store screen. Touch Settings\Auto-update apps to enable this function.

Rate and review

Open the details screen for an application, touch the stars under **Rate this app** to award and input comments, touch **OK** to confirm.

Flag

You can report an inappropriate application to Google Play Store by flagging it. Open the details screen for the application, scroll to the bottom and touch **Flag as inappropriate**, enter the reason and finally touch **Submit**.

8 Multimedia applications

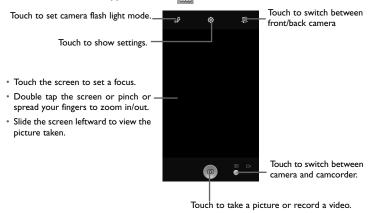

Camera.....

Your phone is fitted with a Camera for taking photos and shooting videos.

Before using the Camera, please ensure that a microSD card, where all pictures and videos are stored, is correctly installed.

To access this function, touch Application icon if from the Home screen and then touch Camera.

To take a picture

The screen acts as the viewfinder. First position the object or landscape in the viewfinder, touch the screen to focus if necessary, touch conto take picture, picture will save automatically.

To shoot a video

Switch Camera mode to Video mode. First position the object or landscape in the viewfinder, and touch icon to start recording. Touch icon to stop recording. The video will be automatically saved.

Further operations when viewing a picture/video you have taken

- · Slide the capture screen to left to access Gallery.
- Touch the Back key to return to Camera or Camcorder.

Settings in framing mode

Before taking a photo/shooting a video, touch the icon to adjust a number of settings in framing mode.

Camera settings

Camcorder settings:

 Microphone Touch to enable/disable voice record while taking a video.

 Video quality Touch to setup video quality as Fine, High or Medium.

Gallery

Gallery acts as a media player for you to view photos and playback videos. In addition, a set of further operations to pictures and videos are available for your choice.

To access this function, touch Application icon | from the Home screen, then touch Gallery.

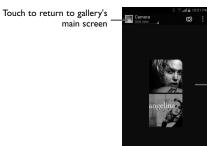

Touch to change and combine

Touch the album to spread it apart.

—Slide left or right to view more albums

To view a picture/play a video

Pictures and videos are displayed by albums in Gallery.

Slide left or right to view more pictures.

- Touch an album and all pictures or videos will spread the screen.
- Touch the picture/video directly to view or play it.
- Slide left/right to view previous or next pictures/videos.

Working with pictures

You can work with pictures by rotating or cropping them, sharing them with friends, setting them as contact photo or wallpaper, etc.

Locate the picture you want to work on, touch the picture from full-screen picture view. Slide the picture bar below left and right to select one, touch icon to share the picture, touch icon and **OK** to delete the picture.

Touch icon and choose Edit to edit a picture.

- Touch to crop, rotate or sharpen the picture.
- 2 Touch to see more beauty options: Dermabrasion, Whitening, Complexion.
- 1 Touch to adjust the color: Saturation, Brightness, Contrast and Smart fill light.
- 4 Touch to see more picture effects: LOMO, Portrait, Fashion and Art.
- 5 Touch to choose a frame for the picture.
- Touch to add a mosaics on picture.
- Touch to input word on picture. You can choose the word style and set the words as a conversation.
- Touch to set Bokeh. You can choose circle bokeh or line bokeh.

Batch operation

Gallery provides a multi-select function, so that you can work with pictures/videos in batches.

Open the main Gallery window or an album, touch menu icon and Select album or Select item to activate batch operation mode (you can also touch and hold one album/picture), then touch albums/pictures you want to work on. Touch icon to perform further actions, like delete and rotate. Touch to share selected ones.

YouTube

YouTube is an online video-sharing service where the user can download, share and view videos. It supports a streaming function that allows you to start watching videos almost as soon as they begin downloading from the Internet.

To access this function, touch Application icon if from the Home screen, then touch YouTube.

As an online video service, your phone must have a network connection to access YouTube.

All videos in YouTube are grouped into several categories, like Popular, Music, etc.

By touching Menu icon | from YouTube screen, you can set General settings and Search settings for YouTube. For details about these features, please visit the YouTube website: www.YouTube.com

Watch videos

Touch a video to play it. In the Playing screen, you can view information and video comments, and also browse links to related videos. You can also rate, share, label as favorite, create a new playlist, etc from this screen.

To exit video playing screen, touch **Back** key to return to the video list.

Music

Using this menu, you can play music files stored on the microSD card in your phone. Music files can be downloaded from computer to microSD card using a USB cable.

To access this function, touch Application icon ## from the Home screen, then touch Music.

You will find four categories in which all songs are classified: Artists, Albums, Songs and Playlists. Touch the icons to view the category. Touch Menu key = and Shuffle all to shuffle all songs,

8.4.1 Playing music

Touch a song or touch **Play** from drop-down menu to play the song.

- Touch to play the current playlist in shuffle mode (tracks are played in random order).
- 2 Touch to select repeat mode: Repeating all songs, Repeating current song, or Repeat is off.
- Touch to skip to the previous track in the album, playlist, or shuffle.
- 4 Touch to skip to the next track in the album, playlist, or shuffle.
- Touch to pause/resume playback.
- Touch to show the displaying song.

While playing songs with Play Music, the operation of pause, play or skip is still available even if the screen is locked.

Adjust sound effects

Touch Menu icon and adjust sound effects from Now playing screen to enable and adjust sound effects.

Working with playlists

Playlists allow you to conveniently organize all songs stored in the SD card.

You can create a new playlist, add a song to the list, and delete or rename a playlist.

To create a playlist

Touch **Recently added** from Playlists screen, touch \equiv and then **Save as playlist**, enter the name and finally touch **Save**.

To delete a playlist

Touch and hold a playlist to show the menu, then touch **Delete**.

To rename a playlist

Touch and hold a playlist to show the menu, then touch **Rename**. When finished, touch **Save** to confirm.

8.5 Video Player

To access this function, touch Application icon $ext{ } ext{ }$

Video Player is a small built-in video player that lists all your videos.

Touch an item from the list to play. While playing, use Pause, Forward and Back functional icons as required, touch a point on the timeline to jump to and play from.

9

Google Maps.....

9.1 Get My Location

9.1.1 Choose a data source to decide My Location

Touch the Application icon **##** from Homescreen and touch ***** to access **Settings**, touch **Location**.

Touch the switch beside **Location** to turn on Location.

9.1.2 Open Google Maps and view My Location

Touch Application icon **#** from the Home screen, then touch **Maps**.

Touch • icon on the map to view My Location.

The map will then center on a blue dot with a blue circle around. Your actual position is within the blue circle.

To move the map, drag the map with your finger.

To zoom in and out of a map, pinch or spread your fingers, or you can also zoom in by double-tapping a location on screen.

To clear the map history, touch Menu icon \blacksquare and then touch **Settings\Maps history**, touch \times .

9.2 Search for a location

While viewing a map, touch the search icon Q to activate search function.

In the search box, enter an address, a city or a local business.

Touch the icon to search, and in a while your search results will appear on the map as red dots. You can touch one to show a label.

9.3 Star a location

Just like bookmarking a web address on the Internet, you can star any position on the map for later use.

9.3.1 How to star (or unstar) a location

Touch & hold a location on a map

Touch the address rectangle that opens

9.3.2 View a list of starred items

Touch at the upper-right corner, and touch Saved places.

The list of your starred items and their addresses opens.

Touch a location in the list to view it.

9.4 Get driving, public transportation or walking directions

9.4.1 Get suggested routes for your trip

Touch icon Y from Maps screen.

- Touch enter bar or the triangle to edit your start point by one of the following methods: entering an address, using My Location, selecting a start point on a map, selecting a starred item, selecting an address from your contacts or using search history.
- · Do likewise for your end point.
- To reverse directions, touch 11.
- Then select a transport mode: driving by car, using public transportation, or walking directions.
- A couple of suggested routes will appear in a list. Touch an route to star navigation.

9.4.2 Preview suggested routes and decide on a route more preferable or feasible to you

You can preview each turn in your route in Navigation, Satellite, and other views. Slide the suggested route up you can view the directions turn-by-turn.

When selecting a more preferable or feasible route, distance and time will be the two most important factors for your evaluation. Distance and estimated time will be displayed at the top of the directions screen.

9.4.3 Search for locations along your route

Please refer to "9.2 Search for a location" for detailed information.

9.5 Arrangement of Layers

Layers allow you to view locations and additional information overlaid on the map. You can add multiple layers or remove only certain layers so you control exactly what information you want visible on the map at one time.

9.5.1 To view multiple layers

Touch Menu key \equiv from Maps screen. All available layers are listed (like Traffic, Satellite, Public transit, etc), select one to view.

Others.....

0.1 File Manager.....

To access this function, touch Application icon icon from the Home screen, then touch File Manager.

File Manager works with both external SD card and internal SD card.

File Manager displays all data stored on both microSD cards, including applications, media files; videos, pictures or audios you have captured; other data transferred via Bluetooth, USB cable, etc.

When you download an application from PC to microSD card, you can locate the application on File Manager, then touch it to install it in your phone.

File Manager allows you to perform and be really efficient with the following common operations: create (sub) folder, open folder/file, view, rename, move, copy, delete, play, share, etc.

0.2 Sound Recorder.....

To access this function, touch Application icon icon from the Home screen, then touch **Sound Recorder**.

Sound Recorder allows you to record voice/sound for seconds/hours.

10.3 Setup......

To access this function, touch the Application icon ignormal from the Home screen, then touch **Setup Wizard.**

Setup helps set up your phone in multiple ways: language, data connection, account setup, etc. This will also be performed the first time you power on your phone.

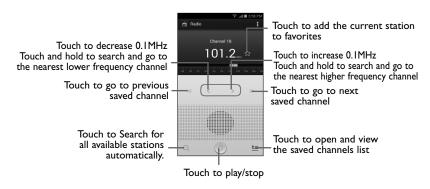

Your phone is equipped with a radio ⁽¹⁾ with RDS ⁽²⁾ functionality. You can use the application as a traditional radio with saved channels or with parallel visual information related to the radio program on the display if you turn to stations that offer Visual Radio service.

To access this function, touch Application icon | from the Home screen, then touch Radio.

To use it, you must plug in your headset, which works as an antenna connected with your phone.

The quality of the radio depends on the coverage of the radio station in that particular area.

⁽²⁾ Depending on your network operator and market.

Available options:

Save channel Save the current tuned station to the channels list.
 Audio mode Listen to the radio using loudspeaker or headset.

Delete Delete the channel
 Enter frequency Turn off the radio.

• **Station Info** Mark the checkbox to show station info.

• Exit Turn off the radio

10.5 Other applications (1).....

The previous applications in this section are preinstalled on your phone. To read a brief introduction of the preinstalled 3rd party applications, please refer to the leaflet provided with the phone. You can also download thousands of 3rd party applications by going to Google Play Store on your phone.

Settings..

Touch Application icon **##** from homescreen and touch ***** to access **Settings**.

II.I Wi-Fi

Using Wi-Fi you can now surf the Internet without using your SIM card whenever you are in range of a wireless network. The only thing you have to do is to enter the **Wi-Fi** screen and configure an access point to connect your phone to the wireless network.

For detailed instructions on using Wi-Fi, please refer to "6.1.2 Wi-Fi".

11.2 Bluetooth

Bluetooth allows your phone to exchange data (videos, images, music, etc.) in a small range with another Bluetooth supported device (phone, computer, printer, headset, car kit, etc.).

For more information on Bluetooth, please refer to "6.3 Connecting to Bluetooth® devices".

11.3 Data usage

To enable/disable mobile data by touching the switch

Mark the checkbox of **Set mobile data limit**, then you can drag the limit line and the warning line according to your limitation. Your mobile data connection will be disabled when the specified limit is reached. You can also choose a data usage cycle to view the statistics and related applications of used data by your phone.

Touch the Menu icon and you can view more settings related to your data usage.

Data usage is measured by your phone, and your carrier may count differently. Please consider using a conservative limit.

11.4 More...

11.4.1 Airplane mode

Mark the checkbox of **Airplane mode** to simultaneously disable all wireless connections including Wi-Fi, Bluetooth and more.

11.4.2 Tethering & portable hotspot

This function allows you to share your phone's mobile data connection via USB or as a portable Wi-Fi access point (Please refer to "6.5 Sharing your phone's mobile data connection").

11.4.3 VPN

A mobile virtual private network (mobile VPN or mVPN) provides mobile devices with access to network resources and software applications on their home network, when they connect via other wireless or wired networks. Mobile VPNs are used in environments where workers need to keep application sessions open at all times, throughout the working day, as the user connects via various wireless networks, encounters gaps in coverage, or suspend-and-resumes their devices to preserve battery life. A conventional VPN cannot survive such events because the network tunnel is disrupted, causing applications to disconnect, time out, fail, or even the computing device itself to crash.

For more information on VPN, please refer to "6.6 Connecting to virtual private networks".

11.4.4 Mobile networks

Data enabled

Mark to enable data access over Mobile network.

• Data connection reminder

Mark to show the message when data connection on.

Data roaming

Mark to allow data connection when roaming.

• Preferred network type

Select preferred network mode such as GSM or WCDMA.

Access Point Names

You can select your preferred network with this menu.

Network operators

You can select a network operator.

11.4.5 Emergency alert settings

Show extreme threats

Mark the checkbox to display alerts for extreme threats to life and property.

Show severe threats

Mark the checkbox to display alerts for severe threats to life and property.

Show AMBER alerts

Mark the checkbox to display child abduction emergency bulletins.

Alert tone

Touch to preview emergency alert tone.

Vibration

Touch to preview emergency alert vibration.

11.5 Sound

Volume

Touch to adjust volume of media, ringtone, alarms.

• Phone ringtone

Touch to set your default incoming call ringtone.

· Vibrate when ringing

Mark the check box to vibrate phone for incoming calls.

Default notification sound

Touch to set your default notification ringtone.

Dial pad touch tones

Mark the check box to enable playing tones when using dial pad.

Touch sounds

Mark the checkbox to enable playing tone when touch any items.

Screen lock sound

Mark the check box to enable sounds to play when locking and unlocking the screen.

Vibrate on touch

Mark the checkbox to enable vibrate when touch any items.

11.6 Display

• **Brightness** Touch to adjust the brightness of the screen.

• Wallpaper Touch to set the wallpaper.

Auto Rotate

Touch to select whether rotate screen automatically or not.

screen

• **Sleep** Touch to set screen timeout.

• Daydream Touch to enable day dream function, and setup each day dream mode.

• **Font size** Touch to set the fond size.

11.7 Battery

In battery management screen, touch one category, then you can view specific power consumption.

You can adjust power use via the screen brightness or screen timeout in Display screen. You can also set your phone to saving mode or ultimate saver mode and in the latter mode, only four functions can be used including Phone, Contacts, Messaging and Calendar.

11.8 Apps

You use the **Manage applications** settings to view details about the applications installed on your phone, to manage their data and force them to stop, and to set whether you want to permit installation of applications that you obtain from web sites and emails.

Manage Apps

- Downloaded: Touch to manage and remove installed applications.
- Running: Touch to view and control currently running service.

• All: Touch to view storage used by applications.

11.9 Location

Access to my location

Touch the switch oto enable to use information from Wi-Fi and mobile networks to determine your approximate location, for use in Google Maps, when you search, and so on. When you select this option, you're asked whether you consent to share your location anonymously with Google's location service.

GPS satellites

Check to use your phone's global positioning system (GPS) satellite receiver to pinpoint your location within an accuracy as close as several meters ("street level"). The process of accessing the GPS satellite and setting your phone's precise location for the first time will require up to 5 minutes. You will need to stand in a place with a clear view of the sky and avoid moving. After this, GPS will only need 20-40 seconds to identify your precise location.

11.10 Security

screen lock

 None Touch to disable screen u 	unlock security.
--	------------------

• **Slide** Touch to enable slide unlock mode.

• Face Unlock Touch to unlock your phone's screen by looking at it.

Pattern Touch to draw pattern to unlock screen.

• PIN Touch to enter a numeric PIN to unlock screen.

Password Touch to enter a password to unlock screen.

Owner info

Touch to input owner information which will display on the lock screen.

Encrypt phone

Require a numeric PIN or passwords to decrypt your phone each time you power it on.

Make passwords visible

Mark the checkbox to show passwords as you type.

App options

Touch to view app detail information.

Unknown sources

Mark the checkbox to permit installation of applications that you obtain from web sites, emails, or other locations other than Google Play Store.

To protect your phone and personal data, download applications only from trusted sources, such as Google Play Store.

Verify apps

Mark the checkbox to disallow or warn before installation of apps that may cause harm.

Trusted credentials

Touch to display trusted CA certificates.

Install from SD card

Touch to install encrypted certificates from the microSD card.

Clear credentials

Touch to remove all certificates.

| | . | | Storage

Use these settings to monitor the total and available space on your phone and on your microSD card; to manage your microSD card; and if necessary, to reset the phone, erasing all of your personal information.

Internal storage

This menu displays the amount of internal phone storage in different colors. The available space will be shown in black, which shows the amount of internal phone storage used by the operating system, its components, applications (including those you downloaded), permanent and temporary data.

If a warning message comes up saying that phone memory is limited, you are required to free up space by deleting some unwanted applications, downloaded files, etc.

SD card

Lists the amount of space on any microSD card installed in your phone and the amount you can use to store applications, videos, music, and other files. You can touch one category to access the function and learn more in details

Mount/Unmount SD card

You must mount the microSD card before using applications and files in it, or formatting the microSD card. Unmount the microSD card from your phone so that you can safely remove it when the phone is on.

Format SD card

Permanently format everything on a microSD card and prepares it for use with your phone.

11.12 Battery

In battery screen you can view the battery usage data since you last connected the phone to a power source. The screen also shows your battery status and how long it has been used since last charging. Touch one category, then you can learn its specific power consumption.

You can adjust power use via the screen brightness or screen timeout in Display screen.

11.13 Apps

You use the Applications settings to view details about the applications installed on your phone, to manage their data and force them to stop, and to set whether you want to permit installation of applications that you obtain from web sites and emails.

11.14 Location

Mode

Touch to choose location mode as **High accuracy**, **Battery saving** and **Device only**.

Recent location requests

This menu displays the amount of apps recently request location access service.

Location Service

Touch to enter Google location settings. The settings options available or not depends on area.

11.15 Security

Encrypt phone

You can encrypt your accounts, settings, download apps and their data, media and other files by touching Encrypt phone.

Set up SIM card lock

Mark the checkbox of Lock SIM card to lock the SIM card with PIN code.

Touch Change SIM PIN to change the PIN code.

Make passwords visible

Mark the checkbox to show passwords as you type.

Device administrators

Touch to view or deactivate device administrators.

App ops

Touch to view or change app permissions.

Unknown sources

Mark the checkbox to permit installation of applications that you obtain from websites, emails, or other locations other than Google Play Store.

To protect your phone and personal data, download applications only from trusted sources, such as Google Play Store.

Verify apps

Mark the checkbox to prevent or warn you before installing apps which might cause harm.

Trusted credential

Touch to display trusted CA certificates.

Install from SD card

Touch to install encrypted certificates from the microSD card.

Touch to remove all credentials.

11.16 Language & input

Use the Language & input settings to select the language for the text on your phone and for configuring the onscreen keyboard. You can also configure voice input settings and the pointer speed.

Language

Touch to select the language and the region you want.

Spell checker

Mark it to enable spell checker when input text via Android keyboard. Touch the \sidetilde{Q} besides it to enter settings.

Personal dictionary

Touch to open a list of the words you've added to the dictionary. Touch a word to edit or delete it. Touch the add button (+) to add a word.

Default

Touch to select a default input method. Touch **Set up input methods** to show all input methods. Touch the settings icon to configure a certain input method.

Android keyboard

The Android keyboard settings apply to the onscreen keyboard that is included with your phone. The correction and capitalization features affect only the English version of the keyboard. Available options are as follows:

Input languages

Touch to set input language.

Auto-capitalization

Mark the checkbox to have the onscreen keyboard automatically capitalize the first letter of the first word after a period, the first word in a text field, and each word in name fields.

Vibrate on keypress

Mark the checkbox to have the phone vibrate briefly each time you touch a key on the onscreen keyboard.

Sound on keypress

Mark the checkbox to play a brief sound each time you touch a key on the onscreen keyboard.

Popup on keypress

Mark the checkbox to popup the key that you touched.

Voice input key

Touch to activate/inactivate voice input key.

Add-on dictionaries

Touch to view add-on dictionaries in other languages.

Block offensive words

Mark the check box to block potentially offensive words.

Auto correction

Touch to turn on/off auto correction, or you can also adjust the sensitivity of correction.

Show correction suggestions

Touch to show or not the correction suggestions while typing.

Next-word suggestion

Mark the check box to enable use the previous word in making suggestion.

Advanced settings

Touch to view more advanced settings for android keyboard, such as **Key pop-up dismiss delay**, Suggest Contact name, and etc.

Swype

Settings

Touch to enter basic settings, Prediction, Voice and Handwriting.

 Vibrate on keypress 	Mark the checkbox to vibrate when keypressing.
---	--

 Sound on keypress 	Mark the checkbox to play a brief sound each time you touch a key
	on the onscreen keyboard.

Mark the checkbox to popup the key that you touched. Popup on keypress

 Long press delay Touch to set up the time when select alternate characters

Mark the checkbox to display the complete Swype path. Show complete trace

 Auto-correction Touch to turn on/off auto correction, or you can also adjust the

sensitivity of correction.

sentence.

 Auto-spacing Mark the checkbox to automatically insert spaces between words.

 Next word prediction Mark the checkbox to show predict words based on previously

entered text.

 Show Voice key Mark the checkbox to show voice key.

 Enable handwriting Mark the checkbox to enable handwriting.

Themes

• Portrait keyboard Touch to set portrait keyboard display as Full screen, Mini left

or Mini right.

• Landscape keyboard Touch to set Landscape keyboard display as Full screen, Mini left,

Mini right or Split.

• **Keyboard height** Touch to set height of portrait keyboard and landscape keyboard.

• Word choice list font size Touch to set the font size of words in choice list,

My words

Touch to setup dictionary and date management.

Languages

Touch to enter select keyboard language and download languages.

Gestures

Touch to learn Swype gestures on the keyboard, these gestures can help you quickly accomplish common tasks.

Help

• How to Swype Touch to view how to use Swype.

• Show help tips Mark the checkbox to turn on helpful tips from Swype.

Google voice typing

Choose input languages

Mark the checkbox to set Google voice typing automatically.

Block offensive words

Mark the checkbox to hide recognized offensive text.

Offline speech recognition

Voice search

Language

Set voice search language.

"OK Google" hotword detection

Touch to enable function that say "OK Google" to launch voice search.

Speech output

Select speech output as always, informative only or hands-free only.

Block offensive words

Mark the checkbox to hide recognized offensive voice results.

Offline speech recognition

Touch to manage downloaded languages.

Personalized recognition

Mark the checkbox to active improve speech recognition accuracy.

Bluetooth headset

Mark the checkbox to active records audio through Bluetooth headset if Bluetooth is available.

Text-to-speech settings

Preferred engine

Touch to choose a preferred text-to-speech engine, touch the settings icon to show more choices for each engine.

Speech rate

Touch to open a dialog where you can select how quickly you want the synthesizer to speak.

Listen to an example

Touch to play a brief sample of the speech synthesizer, using your current settings.

Pointer speed

Touch to open a dialog where you can change the pointer speed, touch **OK** to confirm.

11.17 Backup and reset

Back up my data

Mark the checkbox to back up your phone's settings and other application data to Google Servers, with your Google Account. If you replace your phone, the settings and data you've backed up are restored onto the new phone for the first time you sign in with your Google Account. If you mark this option, a wide variety of settings and data are backed up, including your Wi-Fi passwords, bookmarks, a list of the applications you've installed, the words you've added to the dictionary used by the onscreen keyboard, and most of the settings that you configure with the Settings application. If you unmark this option, you stop backing up your settings and any existing backups are deleted from Google Servers.

Back up account

Touch to back up your account.

Automatic restore

Mark the checkbox to restore back up settings or other data.

Factory data reset

Erase all of your personal data from internal phone storage, including information about your Google Account, any other accounts, your system and application settings, and any downloaded applications. Resetting the phone does not erase any system software updates you've downloaded or any files on your microSD card, such as music or photos. If you reset the phone in this way, you're prompted to re-enter the same kind of information as when you first started Android.

11.18 Add account

Use the Add account to add, remove, and manage your Google and other supported accounts. You can also use these settings to control how and whether all applications send, receive, and synchronize data on their own schedules, and whether all applications can synchronize user data automatically.

Gmail, Google Calendar, and other applications may also have their own settings to control how they synchronize data; see the sections on those applications for details.

Touch an account to see all sync options. Mark the checkbox to permit applications to synchronize data on their own schedule. You can also touch the **Menu** key and **Sync now** to synchronize data for the chosen items of that account.

11.19 Date & time

Use Date & Time settings to customize your preferences for how date and time are displayed.

Automatic date & time

Mark the checkbox to use network provided time or use GPS provided time.

Automatic time zone

Mark the checkbox to use network-provided time zone. Or unmark to set all values manually.

Set date

Touch to open a dialog where you can manually set the phone's date.

Set time

Touch to open a dialog where you can manually set the phone's time.

Select time zone

Touch to open a dialog where you can set the phone's time zone.

Use 24-hour format

Mark the checkbox to display the time using 24-hour clock format.

Choose date format

Touch to open a dialog where you can select the format for displaying dates.

NTP server

Select the type of NTP servers.

11.20 Accessibility

You use the Accessibility settings to configure any accessibility plug-ins you have installed on your phone.

Talkback

Touch to turn/off the function which provides spoken feedback to help blind and low-vision users.

Captions

Touch to enable captions, and set the language, text size and style of it.

Magnification gestures

Touch the Touch to turn on the function. When this feature is turned on, you can zoom in and out by triple-tapping the screen.

Large text

Mark the checkbox to enlarge the screen text.

Power button ends call

Mark the checkbox to end a call by pressing Power key during the call.

Auto-rotate Orientation

Mark the checkbox to rotate screen automatically.

Speak passwords

Mark the checkbox to speak passwords while typing.

Accessibility shortcut

Touch the oo to turn on/off this function. When this feature is turned on, you can quickly enable accessibility features in two steps.

Touch & hold delay

Touch to adjust the duration of touch and hold delay. This function enables your phone to differ touch and touch & hold, which may avoid incorrect operations.

11.21 Printing

Your device supports printing documents by Cloud print. Touch **Cloud Print**, then touch to turn Cloud Print on/off.

When this feature is turned on, touch **Cloud print** to scan available printers, and then choose an available printer for document printing setup. From Cloud Print screen, touch and then touch **Add printer** to add more printers via Wi-Fi. Touch and then touch **Settings**, for additional options.

11.22 Developer options

To access this function, touch **Settings\About phone**, then touch **Build number** 7 times. Now **Development** is available.

The Developer options screen contains settings that are useful for developing Android applications. For full information, including documentation of the Android applications and development tools, see the Android developer web site (http://developer.android.com).

Take bug report

Touch to select to collect information about your current device state and send as an email message.

Desktop backup password

Touch to set/change/remove desktop full backup password.

Stay awake

Mark the checkbox to prevent the screen from dimming and locking when the phone is connected to a charger or to a USB device that provides power. Don't use this setting with a static image on the phone for long periods of time, or the screen may be marked with that image.

Select runtime

Touch to select runtime mode, use Dalvik or ART.

Enable Bluetooth HCI snoop log

Mark the checkbox to active capture all Bluetooth HCl packets in a file.

Process Stats

Touch to view geeky states about running processes.

Enable QuickBoot mode

Mark the checkbox to active put device into QuickBoot mode.

USB debugging

Mark the checkbox to permit debugging tools on a computer to communicate with your phone via a USB connection.

Revoke USB debugging authorization

Touch it to revoke access to USB debugging from all computer you have previously authorized, touch **OK** to confirm.

Power menu bug report

Mark the checkbox to select to include option in power menu for submitting a bug report.

Allow mock locations

Mark the checkbox to permit a development tool on a computer to control where the phone believes it is located, rather than using the phone's own internal tools for this purpose.

Select debug app

Touch to select debug app.

Wait for debugger

Mark the checkbox to active debugged applications waits for debugger to attach before executing.

Verify apps over USB

Mark the checkbox to check apps over USB.

Wireless display certification

Mark the checkbox to active show options for wireless display certification.

Show touches

Mark the checkbox to show visual feedback for touches.

Pointer location

Mark the checkbox to show current touch data.

Show surface updates

Mark the checkbox to show flash entire window surfaces when they update.

Show layout bounds

Mark the checkbox to show clip bounds, margins, etc.

Force RTL layout direction

Mark the checkbox to active force screen layout direction to RTL for all locales.

Window animation scale

Touch to adjust the animation scale for your window.

Transition animation scale

Touch to adjust the animation scale while performing transition.

Animator duration scale

Touch to adjust the animation duration scale.

Mark the checkbox to force use 2D hardware acceleration in applications.

Show GPU view updates

Mark the checkbox to show GPU view updates.

Show hardware layers updates

Mark the checkbox to show hardware layers updates.

Show GPU overdraw

Mark the checkbox to show GPU overdraw.

Force 4x MSAA

Mark the checkbox to enable 4x MSAA.

Disable HW overlays

Mark the checkbox to select to always use GPU for screen compositing.

Strict mode enabled

Mark the checkbox to enable strict mode. After enabled, the screen will flash when applications do long operations on the main thread.

Show CPU usage

Mark the checkbox to show current CPU usage.

Profile GPU rendering

Mark the checkbox to use 2D hardware acceleration in applications.

Enable OpenGL traces

Touch to adjust OpenGL traces.

Don't keep activities

Mark the checkbox to destroy all activities as soon as you leave.

Background process limit

Touch to change the limit for background processes.

Show all ANRs

Mark the checkbox to show "Application Not Responding" dialog for background applications.

11.23 Regulatory & Safety

This contains information about product model name, manufacturer name, IMEI and information of certifications.

11.24 About phone

This contains information about things ranging from Legal information, Model number, Firmware version, Baseband version, Kernel version, Build number to those listed below:

Software updates

Touch to check for Software updates.

Status

This contains the status of the Battery status, Battery level, My phone number, Network, Signal strength, etc.

Legal information

Touch to view legal information.

2 Making the most of your phone

12.1 FOTA Upgrade

Using FOTA Upgrade tool you can update your phone's software.

To access **System Updates**, please open **Settings\About phone\System updates**. Touch **Check for updates**, and the phone will search for the latest software. If you want to update the system, please touch the button **Download**, after it's done please touch **Install** to complete the upgrade. Now your phone's software will have the latest version.

You should turn on data connection or Wi-Fi before searching for updates. Settings for auto-check intervals and reminders about upgrades are also available once you restart the phone.

If you have chosen auto-check, when the system discovers the new version, the icon \uparrow will appear in the status bar. Touch the notification to access the **System Updates** directly.

3 12 Month Limited Warranty

TCT Mobile (US), Inc. warrants to the original retail purchaser of this wireless device that should this product or part thereof during normal consumer usage and condition be proven to be defective in material or workmanship that results in product failure within the first twelve (12) months from the date of purchase as shown on your original sales receipt from an authorized sales agent. Such defect(s) will be repaired or replaced (with new or rebuilt parts) at the company's option without charge for parts or labor directly related to the defect(s). Batteries, power adapters, and other accessories sold as in box items are also warranted against defects and workmanship that results in product failure within the first twelve (12) month period from the date of purchase. This warranty extends to products purchased and sold within the United States.

The limited warranty for your wireless device will be voided if any of the following conditions occur:

- Non-compliance with the instructions for use or installation, or with technical and safety standards applicable in the geographical area where your phone is used;
- · Connection to any equipment not supplied or not recommended by TCT Mobile (US), Inc.;
- Modification or repair performed by individuals not authorized by TCT Mobile (US), Inc. or its affiliates;
- Changes to the device operating system by the user or third party applications;
- Acts of god such as inclement weather, lightning, power surges, fire, humidity, infiltration of liquids or foods, chemical products, download of files, crash, high voltage, corrosion, oxidation;
- Removal or altering of the wireless device's event labels or serial numbers (IMEI);
- Damage from exposure to water or other liquids, moisture, humidity, excessive temperatures or extreme environmental conditions, sand, excess dust and any condition outside the operating guidelines;
- Defects in appearance, cosmetic, decorative or structural items such as framing and non-operative parts;
- · Damage as result of physical abuse regardless of cause.

There are no express warranties, whether written, oral or implied, other than this printed limited warranty or the mandatory warranty provided by your jurisdiction. In no event shall TCT Mobile (US), Inc. or any of its affiliates be liable for incidental or consequential damages of any nature whatsoever, including but not limited to commercial loss, to the full extent those damages can be disclaimed by law. Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitation of the duration of implied warranties, so the preceding limitations or exclusions may not apply to you.

How to obtain Support: Contact the customer care center by calling (855-368-0829) or going to (http://www.alcatelonetouch.com/usa/). We have placed many self-help tools that may help you to isolate the problem and eliminate the need to send your wireless device in for service. In the case that your wireless device is no longer covered by this limited warranty due to time or condition, you may utilize our out of warranty repair options.

How to obtain Hardware Service within the terms of this warranty: Create a user profile (alcatel.finetw. com) and then create an RMA for the defective device. Ship the device with a copy of the original proof of purchase (e.g. original copy of the dated bill of sale, invoice) with the owner's return address (No PO Boxes accepted), wireless carrier's name, alternate daytime phone number, and email address with a complete problem description. Only ship the device. Do not ship the SIM card, memory cards, or any other accessories such as the power adapter. You must properly package and ship the wireless device to the repair center. TCT Mobile (US), Inc. is not responsible for devices that do not arrive at the service center or are damaged in transit. Insurance is recommended with proof of delivery. Upon receipt, the service center will verify the warranty conditions, repair, and return your device to the address provided in the RMA. Check the warranty repair status by going online with the RMA number on web portal.

4 Troubleshooting.....

Before contacting the service center, you are advised to follow the instructions below:

- You are advised to fully charge () the battery for optimal operation.
- Avoid storing large amounts of data in your phone as this may affect its performance.
- Use Factory data reset and the upgrade tool to perform phone formatting or software
 upgrading (to reset factory data, hold down the Power key and the Volume up key at the same
 time). ALL User phone data: contacts, photos, messages and files, downloaded applications will be
 lost permanently.

and carry out the following checks:

My phone is frozen or cannot be switched on

- Check the battery power level, charge for at least 20 minutes.
- If it still does not work, please reset the phone using the Power key and the Volume up key.

My phone has not responded for several minutes

• Restart your phone by pressing and holding the Power key.

My phone turns off by itself

- Check that your screen is locked when you are not using your phone, and make sure the **Power** key is not mis-contacted due to unlocked screen.
- · Check the battery charge level.

My phone cannot charge properly

- Make sure that your battery is not completely discharged; if the battery power is empty for a long time, it may take around 20 minutes to display the battery charger indicator on the screen.
- Make sure charging is carried out under normal conditions (0°C (32°F) to +40°C (104°F)).
- When abroad, check that the voltage input is compatible.

My phone cannot connect to a network or "No service" is displayed

- Try connecting in another location.
- Verify the network coverage with your operator.
- Check with your operator that your SIM card is valid.

- Try selecting the available network(s) manually (see "11.4.4 Mobile networks")
- Try connecting at a later time if the network is overloaded.

My phone cannot connect to the Internet

- Check that the IMEI number (press *#06#) is the same as the one printed on your warranty card or box.
- Make sure that the internet access service of your SIM card is available.
- · Check your phone's Internet connecting settings.
- Make sure you are in a place with network coverage.
- Try connecting at a later time or another location.

Invalid SIM card

- · Make sure the SIM card has been correctly inserted (see "Inserting or removing the SIM card").
- Make sure the chip on your SIM card is not damaged or scratched.
- Make sure the service of your SIM card is available.

Unable to make outgoing calls

- Make sure you have dialed a valid number and have touched
- For international calls, check the country and area codes.
- Make sure your phone is connected to a network, and the network is not overloaded or unavailable.
- Check your subscription status with your operator (credit, SIM card valid, etc.).
- · Make sure you have not barred outgoing calls.
- · Make sure that your phone is not in airplane mode.

Unable to receive incoming calls

- Make sure your phone is switched on and connected to a network (check for overloaded or unavailable network).
- Check your subscription status with your operator (credit, SIM card valid, etc.).
- Make sure you have not forwarded incoming calls.
- · Make sure that you have not barred certain calls.
- Make sure that your phone is not in airplane mode.

The caller's name/number does not appear when a call is received

- Check that you have subscribed to this service with your operator.
- Your caller has concealed his/her name or number.

I cannot find my contacts

- · Make sure your SIM card is not broken.
- Make sure your SIM card is inserted properly.
- Import all contacts stored in SIM card to phone.

The sound quality of the calls is poor

- You can adjust the volume during a call by pressing the Volume Up/Down key.
- Make sure that the receiver, connector or speaker on your phone is clean.

I am unable to use the features described in the manual

- Check with your operator to make sure that your subscription includes this service.
- Make sure this feature does not require an ALCATEL ONETOUCH accessory.

When I select a number from my contacts, the number cannot be dialed

- Make sure that you have correctly recorded the number in your file.
- Make sure that you have selected the country prefix when calling a foreign country.

I am unable to add a contact in my contacts

 Make sure that your SIM card contacts are not full; delete some files or save the files in the phone contacts (i.e. your professional or personal directories).

My callers are unable to leave messages on my voicemail

· Contact your network operator to check service availability.

I cannot access my voicemail

- Make sure your operator's voicemail number is correctly entered in "Voicemail number".
- Try later if the network is busy.

I am unable to send and receive MMS

- · Check your phone memory availability as it might be full.
- Contact your network operator to check service availability and check MMS parameters (see "4.1.3 Adjust message settings").
- Verify the server center number or your MMS profile with your operator.
- The server center may be swamped, try again later.

SIM card PIN locked

• Contact your network operator to obtain the PUK code (Personal Unblocking Key).

I am unable to connect my phone to my computer

- · Check that your USB driver is installed properly.
- Check that you have marked the checkbox of USB debugging (See 11.19 Developer options)
- Make sure that you're using the right cable from the box.

I am unable to download new files

- Make sure there is sufficient phone memory for your download.
- Check your subscription status with your operator.

The phone cannot be detected by others via Bluetooth

- Make sure that Bluetooth is turned on and your phone is visible to other users (see "6.3 Connecting to Bluetooth ® devices").
- Make sure that the two phones are within Bluetooth's detection range.

How to make your battery last longer

- Make sure you follow the complete charge time (minimum 2.5 hours).
- After a partial charge, the battery level indicator may not be exact. Wait for at least 20 minutes after removing the charger to obtain an exact indication.
- · Switch on the backlight upon request.
- Extend the email auto-check interval for as long as possible.
- · Update news and weather information on manual demand, or increase their auto-check interval.
- Exit background-running applications if they are not being used for a long time.
- Deactivate Bluetooth, Wi-Fi, or GPS when not in use.

The phone will become warm following prolonged calls, game playing, internet surfing or running other complex applications.

This heating is a normal consequence of the CPU handling excessive data. Ending above actions will
make your phone return to normal temperatures.

Safety and Use.....

We recommend that you read this chapter carefully before using your phone. The manufacturer disclaims any liability for damage, which may result as a consequence of improper use or use contrary to the instructions contained herein.

EXPOSURE TO RADIO FREQUENCY SIGNALS

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals. In August 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for handheld wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

ANSI C95.1 (1992) * NCRP Report 86 (1986) * ICNIRP (1996) *

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C951).

The design of your phone complies with the FCC guidelines (and those standards).

- I: American National Standards Institute.
- 2: National Council on Radiation Protection and Measurements.
- 3: International Commission on Nonionizing Radiation Protection.

ANTENNA SAFETY

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations. Please contact your local dealer for replacement antenna.

Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

DRIVING SAFETY

Talking on the phone while driving is extremely dangerous and is illegal in some states. Remember, safety comes first. Check the laws and regulations on the use of phones in the areas where you drive. Always obey them. Also, if using your phone while driving, please:

- · Give full attention to driving. Driving safely is your first responsibility.
- · Use hands-free operation, if available.
- Pull off the road and park before making or answering a call, if driving conditions so require.

If you must use the phone while driving, please use one-touch, speed dialing, and auto answer modes.

An airbag inflates with great force. DO NOT place objects, including both installed or portable wireless equipment, in the area over the airbag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

WARNING: Failure to follow these instructions may lead to serious personal injury and possible property damage.

ELECTRONIC DEVICES

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals. Most modern electronic equipment is shielded from RF energy. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone. Therefore, use of your phone must be restricted in certain situations.

PACEMAKERS

The Health Industry Manufacturers Association recommends that a minimum separation of six (6") inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research. Persons with pacemakers:

- ALWAYS keep the phone more than six inches from your pacemaker when the phone is turned on.
- Do not carry the phone in a breast pocket.
- Use the ear opposite the pacemaker to minimize the potential for interference.
- If you have any reason to suspect that interference is taking place, turn your phone OFF immediately.

HEARING AIDS

Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your service provider (or call the customer service line to discuss alternatives).

OTHER MEDICAL DEVICES

If you use any other personal medical device, consult the manufacturer of your device to determine if they are adequately shielded from external RF energy.

Your physician may be able to assist you in obtaining this information. Turn your phone OFF in healthcare facilities when any regulations posted in these areas instruct you to do so. Hospitals or healthcare facilities may be using equipment that could be sensitive to external RF energy.

VEHICLES

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

POSTED FACILITIES

Turn your phone OFF where posted notices so require.

OTHER SAFETY GUIDELINES

AIRCRAFT

FCC regulations prohibit using your phone while in the air. Turn your phone OFF before boarding an aircraft. Always request and obtain prior consent and approval of an authorized airline representative before using your phone aboard an aircraft.

Always follow the instructions of the airline representative whenever using your phone aboard an aircraft, to prevent any possible interference with airborne electronic equipment.

BLASTING AREAS

To avoid interfering with blasting operations, turn your phone OFF when in a "blasting area" or in areas posted: "Turn off two-way radio." Obey all signs and instructions.

POTENTIALLY EXPLOSIVE ATMOSPHERES

Turn your phone OFF when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Areas with a potentially explosive atmosphere are often, but not always, clearly marked. They include fueling areas such as gas stations; below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust, or metal powders; and any other area where you would normally be advised to turn off your vehicle's engine.

PRECAUTIONS

Your Handheld Portable Telephone is a high quality piece of equipment. Before operating, read all instructions and cautionary markings on (1) USB AC Adapter (2) Battery.

Failure to follow the directions below could result in serious bodily injury and/or property damage due to battery liquid leakage, fire or rupture.

- DO NOT use this equipment in an extreme environment where high temperature or high humidity exists.
- DO NOT abuse the equipment. Avoid striking, shaking or shocking. When not using, lay down the unit to avoid
 possible damage due to instability.
- DO NOT expose this equipment to rain or spilled beverages.
- DO NOT use unauthorized accessories.
- DO NOT disassemble the phone or its accessories. If service or repair is required, return unit to an authorized cellular service center. If unit is disassembled, the risk of electric shock or fire may result.
- DO NOT short-circuit the battery terminals with metal items etc.

SAFETY INFORMATION FOR FCC RF EXPOSURE WARNING! READ THIS INFORMATION BEFORE USING CAUTIONS

In August 1996 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies.

The design of this phone complies with the FCC guidelines and these international standards.

BODY-WORN OPERATION

This device was tested for typical body-worn operations with the back of the phone kept 1.5 cm. from the body. To maintain compliance requirements, use only belt-clips, holsters or similar accessories that maintain a 1.5 cm separation distance between the user's Body and the back of the phone, including the antenna.

The use of belt-clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided. For more information about RF exposure, please visit the FCC website at http://www.fcc.gov

SAR INFORMATION

THIS MODEL PHONE MEETS THE GOVERNMENT'S REQUIREMENTS FOR EXPOSURE TO RADIO WAYES.

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. * Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 0.776 W/Kg and when worn on the body is 1.464 W/Kg, as described in this user guide, is 1.166 W/Kg. (Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements). While there may be differences between the SAR levels of various cellphones and at various positions, they all meet the government requirement for RF exposure.

For body-worn operation, the cellphone meets FCC RF exposure guidelines provided that it is used with a non-metallic accessory with the handset at least 10 mm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines.

SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/oet/ea after searching on JYCBLADE.

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) web-site at http://www.ctia.org.

* In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

For this device, the highest reported SAR value for usage near the body is:

Maximum SAR for this model and conditions under which it was recorded		
ONE TOUCH 7040N(Body-worn)	1.464 W/Kg	

HEARING AID COMPATIBILITY (HAC) FOR WIRELESS TELECOMMUNICATIONS DEVICES OUR COMMITMENT

We believe that all of our customers should be able to enjoy the benefits of digital wireless technologies. We are committed to providing a selection of compatible devices for our customers who wear hearing aids.

THIS PHONE HAS A HAC RATING OF M4/T4. Reference ANSI C63.19-2011

FCC ID: RAD475

WHAT IS HEARING AID COMPATIBILITY?

The Federal Communications Commission has implemented rules and a rating system designed to enable people who wear hearing aids to more effectively use these wireless telecommunications devices. The standard for compatibility of digital wireless phones with hearing aids is set forth in American National Standard Institute (ANSI) standard C63.19. There are two sets of ANSI standards with ratings from one to four (four being the best rating): an "M" rating for reduced interference making it easier to hear conversations on the phone when using the hearing aid microphone, and a "T" rating that enables the phone to be used with hearing aids operating in the telecoil mode thus reducing unwanted background noise.

HOW WILL I KNOW WHICH WIRELESS PHONES ARE HEARING AID COMPATIBLE?

The Hearing Aid Compatibility rating is displayed on the wireless phone box.

A phone is considered Hearing Aid Compatible for acoustic coupling (microphone mode) if it has an "M3" or "M4" rating. A digital wireless phone is considered Hearing Aid Compatible for inductive coupling (telecoil mode) if it has a "T3" or "T4" rating.

This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids. It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider about its return and exchange policies and for information on hearing aid compatibility.

HOW WILL I KNOW IF MY HEARING AID WILL WORK WITH A PARTICULAR DIGITAL WIRELESS PHONE?

You'll want to try a number of wireless phones so that you can decide which works the best with your hearing aids. You may also want to talk with your hearing aid professional about the extent to which your hearing aids are immune to interference, if they have wireless phone shielding, and whether your hearing aid has a HAC rating.

FOR MORE INFORMATION ABOUT HEARING AIDS AND DIGITAL WIRELESS PHONE

- FCC Hearing Aid Compatibility and Volume Control http://www.fcc.gov/cgb/dro/hearing.html

FDA CONSUMER UPDATE

U.S. FOOD AND DRUG ADMINISTRATION - CENTER FOR DEVICES AND

RADIOLOGICAL

HEALTH CONSUMER UPDATE ON WIRELESS PHONES

I. Do wireless phones pose a health hazard?

The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, however, that wireless phones are absolutely safe. Wireless phones emit low levels of radiofrequency energy (RF) in the microwave range while being used. They also emit very low levels of RF when in the idle mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects. Many studies of low level RF exposures have not found any biological effects. Some studies have suggested that some biological effects may occur, but such findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

2. What is FDA's role concerning the safety of wireless phones?

Under the law, FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, as it does with new drugs or medical devices. However, the agency has authority to take action if wireless phones are shown to emit radiofrequency energy (RF) at a level that is hazardous to the user. In such a case, FDA could require the manufacturers

of wireless phones to notify users of the health hazard and to repair, replace or recall the phones so that the hazard no longer exists. Although the existing scientific data do not justify FDA regulatory actions, FDA has urged the wireless phone industry to take a number of steps, including the following:

- Support needed research into possible biological effects of RF of the type emitted by wireless phones;
- Design wireless phones in a way that minimizes any RF exposure to the user that is not necessary for device function;

and

• Cooperate in providing users of wireless phones with the best possible information on possible effects of wireless phone use on human health.

FDA belongs to an interagency working group of the federal agencies that have responsibility for different aspects of RF safety to ensure coordinated efforts at the federal level. The following agencies

belong to this working group:

- · National Institute for Occupational Safety and Health
- Environmental Protection Agency
- Federal Communications Commission
- · Occupational Safety and Health Administration
- National Telecommunications and Information Administration

The National Institutes of Health participates in some inter-agency working group activities, as well. FDA shares regulatory responsibilities for wireless phones with the Federal Communications Commission (FCC). All phones that are sold in the United States must comply with FCC safety guidelines that limit RF exposure. FCC relies on FDA and other health agencies for safety questions about wireless phones. FCC also regulates the base stations that the wireless phone net works rely upon. While these base stations operate at higher power than do the wireless phones themselves, the RF exposures that people get from these base stations are typically thousands of times lower than

those they can get from wireless phones. Base stations are thus not the subject of the safety questions discussed in this document.

3. What kinds of phones are the subject of this update?

The term "wireless phone" refers here to hand-held wireless phones with built-in antennas, often called "cell," "mobile," or "PCS" phones. These types of wireless phones can expose the user to measurable radiofrequency energy (RF) because of the short distance between the phone and the user's head. These RF exposures are limited by Federal Communications Commission safety guidelines that were developed with the advice of FDA and other federal health and safety agencies. When the phone is located at greater distances from the user, the exposure to RF is drastically lower because a person's RF exposure decreases rapidly with increasing distance from the source. The so-called "cordless phones," which have a base unit connected to the telephone wiring in a house, typically operate at far lower power levels, and thus produce RF exposures far below the FCC safety limits.

4. What are the results of the research done already?

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments investigating the effects of radiofrequency energy (RF) exposures characteristic of wireless phones have yielded conflicting results that often cannot be repeated in other laboratories. A few animal studies, however, have suggested that low levels of RF could accelerate the development of cancer in laboratory animals. However, many of the studies that showed increased tumor development used animals that had been genetically engineered or treated with cancer-causing chemicals so as to be predisposed to develop cancer in the absence of RF exposure. Other studies exposed the animals to RF for up to 22 hours per day. These conditions are not similar to the conditions under which people use wireless phones, so we don't know with certainty what the results of such studies mean for human health. Three large epidemiology studies have been published since December 2000. Between them, the studies investigated any possible association between the use of wireless phones and primary brain cancer, glioma, meningioma, or acoustic neu-roma, tumors of the brain or salivary gland, leukemia, or other cancers. None of the studies demonstrated the existence of any harmful health effects from wireless phone RF exposures. However, none of the studies can answer questions about long-term exposures, since the average period of phone use in these studies was around three years.

5. What research is needed to decide whether RF exposure from wireless phones poses a health risk? A combination of laboratory studies and epidemiological studies of people actually using wireless phones would provide some of the data that are needed. Lifetime animal exposure studies could be completed in a few years. However, very large numbers of animals would be needed to provide reliable proof of a cancer promoting effect if one exists. Epidemiological studies can provide data that is directly applicable to human populations, but 10 or more years' follow-up may be needed to provide answers about some health effects, such as cancer. This is because the interval between the time of exposure to a cancer-causing agent and the time tumors develop - if they do -may be many, many years. The interpretation of epidemiological studies is hampered by difficulties in measuring actual RF exposure during day-to-day use of wireless phones. Many factors affect this measurement, such as the angle at which the phone is held, or which model of phone is used.

6. What is FDA doing to find out more about the possible health effects of wireless phone RF? FDA is working with the U.S. National Toxicology Program and with groups of investigators around the world to

ensure that high priority animal studies are conducted to address important questions about the effects of exposure to radiofrequency energy (RF). FDA has been a leading participant in the World Health Organization International Electromagnetic Fields (EMF) Project since its inception in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world. The Project has also helped develop a series of public information documents on EMF issues. FDA and the Cellular Telecommunications & Internet Association (CTIA) have a formal Cooperative Research and Development Agreement (CRADA) to do research on wireless phone safety. FDA provides the scientific oversight, obtaining input from experts in government, industry, and academic organizations. CTIA-funded research is conducted through contracts to independent investigators. The initial research will include both laboratory studies and studies of wireless phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world.

7. How can I find out how much radiofrequency energy exposure I can get by using my wireless phone? All phones sold in the United States must comply with Federal Communications Commission (FCC) guidelines that limit radiofrequency energy (RF) exposures. FCC established these guidelines in consultation with FDA and the other federal health and safety agencies. The FCC limit for RF exposure from wireless telephones is set at a Specific Absorption Rate (SAR) of I.6 watts per kilogram (I.6 W/kg). The FCC limit is consistent with the safety standards developed by the Institute of Electrical and Electronic Engineering (IEEE) and the National Council on Radiation Protection and Measurement. The exposure limit takes into consideration the body's ability to remove heat from the tissues that absorb energy from the wireless phone and is set well below levels known to have effects. Manufacturers of wireless phones must report the RF exposure level for each model of phone to the FCC. The FCC website (http://www.fda.gov (under "c" in the subject index, select Cell Phones > Research)) gives directions for locating the FCC identification number on your phone so you can find your phone's RF exposure level in the online listing.

8. What has FDA done to measure the radiofrequency energy coming from wireless phones?

The Institute of Electrical and Electronic Engineers (IEEE) is developing a technical standard for measuring the radiofrequency energy (RF) exposure from wireless phones and other wireless handsets with the participation and leadership of FDA scientists and engineers. The standard, "Recommended Practice for Determining the Spatial-Peak Specific Absorption Rate (SAR) in the Human Body Due to Wireless Communications Devices: Experimental Techniques," sets forth the first consistent test methodology for measuring the rate at which RF is deposited in the heads of wireless phone users. The test method uses a tissue-simulating model of the human head. Standardized SAR test methodology is expected to greatly improve the consistency of measurements made at different laboratories on the same phone. SAR is the measurement of the amount of energy absorbed in tissue, either by the whole body or a small part of the body. It is measured in watts/kg (or milliwatts/g) of matter. This measurement is used to determine whether a wireless phone complies with safety guidelines.

9. What steps can I take to reduce my exposure to radiofrequency energy from my wireless phone? If there is a risk from these products—and at this point we do not know that there is—it is probably very small. But if

If there is a risk from these products—and at this point we do not know that there is—it is probably very small. But if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your exposure to radiofrequency energy (RF). Since time is a key factor in how much exposure a person receives, reducing the amount of time spent using a wireless phone will reduce RF exposure.

• If you must conduct extended conversations by wireless phone every day, you could place more distance between

your body and the source of the RF, since the exposure level drops off dramatically with distance.

For example, you could use a headset and carry the wireless phone away from your body or use a wireless phone connected to a remote antenna. Again, the scientific data do not demonstrate that wireless phones are harmful. But if you are concerned about the RF exposure from these products, you can use measures like those described above to reduce your RF exposure from wireless phone use.

10. What about children using wireless phones?

The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to radiofrequency energy (RF), the measures described above would apply to children and teenagers using wireless phones. Reducing the time of wireless phone use and increasing the distance between the user and the RF source will reduce RF exposure. Some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all. For example, the government in the United Kingdom distributed leaflets containing such a recommendation in December 2000. They noted that no evidence exists that using a wireless phone causes brain tumors or other ill effects. Their recommendation to limit wireless phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists.

II. What about wireless phone interference with medical equipment?

Radiofrequency energy (RF) from wireless phones can interact with some electronic devices. For this reason, FDA helped develop a detailed test method to measure electromagnetic interference (EMI) of implanted cardiac pacemakers and defibrillators from wireless telephones. This test method is now part of a standard sponsored by the Association for the Advancement of Medical instrumentation (AAMI). The final draft, a joint effort by FDA, medical device manufacturers, and many other groups, was completed in late 2000. This standard will allow manufacturers to ensure that cardiac pacemakers and defibrillators are safe from wireless phone EMI. FDA has tested hearing aids for interference from handheld wireless phones and helped develop a voluntary standard sponsored by the Institute of Electrical and Electronic Engineers (IEEE). This standard specifies test methods and performance requirements for hearing aids and wireless phones so that that no interference occurs when a person uses a "compatible" phone and a "compatible" hearing aid at the same time. This standard was approved by the IEEE in 2000. FDA continues to monitor the use of wireless phones for possible interactions with other medical devices. Should harmful interference be found to occur, FDA will conduct testing to assess the interference and work to resolve the problem.

12. Where can I find additional information?

For additional information, please refer to the following resources:

- FDA web page on wireless phones (http://www.fda.gov/Radiation-EmittingProducts/RadiationEmittingProductsandProcedures/HomeBusinessandEntertainment/CellPhones/default.htm)
- Federal Communications Commission (FCC) RF Safety Program (http://www.fcc.gov/oet/rfsafety)
- International Commission on Non-Ionizing Radiation Protection (http://www.icnirp.de)
- World Health Organization (WHO) International EMF Project (http://www.who.int/peh-emf/en/)
- National Radiological Protection Board (UK) (http://www.hpa.org.uk/radiation/)

AVOID POTENTIAL HEARING LOSS

Prolonged exposure to loud sounds (including music) is the most common cause of preventable hearing loss. Some scientific research suggests that using portable audio devices, such as portable music players and cellular telephones, at high volume settings for long durations may lead to permanent noise-induced hearing loss. This includes the use of headphones (including headsets, earbuds and Bluetooth® or other wireless devices). Exposure to very loud sound has also been associated in some studies with tinnitus (a ringing in the ear), hypersensitivity to sound and distorted hearing, Individual susceptibility to noise-induced hearing loss and other potential hearing problems varies.

The amount of sound produced by a portable audio device varies depending on the nature of the sound, the device, the device settings and the headphones. You should follow some commonsense recommendations when using any portable audio device:

- Set the volume in a quiet environment and select the lowest volume at which you can hear adequately.
- When using headphones, turn the volume down if you cannot hear the people speaking near you or if the person sitting next to you can hear what you are listening to.
- Do not turn the volume up to block out noisy surroundings. If you choose to listen to your portable device in a noisy environment, use noise-cancelling headphones to block out background environmental noise.
- Limit the amount of time you listen. As the volume increases, less time is required before your hearing could be affected.
- Avoid using headphones after exposure to extremely loud noises, such as concerts, that might cause temporary hearing loss. Temporary hearing loss might cause unsafe volumes to sound normal.
- Do not listen at any volume that causes you discomfort. If you experience ringing in your ears, hear muffled speech
 or experience any temporary hearing difficulty after listening to your portable audio device, discontinue use and
 consult your doctor.

FCC COMPLIANCE INFORMATION

This device complies with Part 15 of FCC Rules.

Operation is subject to the following two conditions:

- (I) This device may not cause harmful interference, and
- (2) This device must accept any interference received. Including interference that may cause undesired operation.

INFORMATION TO THE USER

This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful Interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful Interference to radio communications. However, there is no guarantee that interference will not occur in a particular Installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver.
- · Connect the equipment into an outlet of a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for assistance.

CAUTION: Changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. Connecting of peripherals requires the use of grounded shielded signal cables.

INFORMATION ABOUT SAFEGUARDING HANDSETS

We encourage customers to take appropriate measures to secure their handsets and invite them to take advantage of the features available on this handset to help secure it from theft and/or other unauthorized access and use. This handset has a locking function (e.g., user-defined codes or patterns) that can serve as a first line of defense against unauthorized use or access to stored information. Your service provider may also offer remote locking and wiping capabilities as an additional service against theft, contact your service provider for availability of this service.
